LOGO OVERVIEW

Primary Logo

The primary logo combines bold geometric forms with the word "BIKES" to create an abstract front view of a motorcycle. The angular upper elements represent the handlebars, while the lower V-shaped form suggests the front wheel and structure of the bike. Its balanced and minimal design communicates speed, precision, strength, and modernity.

Logo Variations

The logo may be used in its primary red version, as well as in black or white depending on the background and application. These variations preserve the same structure, proportions and visual identity across digital and printed materials.

B/W Logos

The black-and-white logo versions are intended for monochrome printing, engraving, embossing, partnerships, official documents, and applications where the primary brand colour cannot be used.
